EXPERIENTIAL LEARNING PROGRAM SINGAPORE

Students of ISME visit Singapore as part of the International Business Program. This is a part of their experiential learning. During this 10-day immersion program, the students reside in the hostels of Singapore Institute of Management (SIM) or Management Development Institute of Singapore (MDIS). This gives them an opportunity to interact with the local students and get certification in International Business from a leading Institute in Singapore.

There are three dimensions to the International Business Program at Singapore-Academia, Industry and Cultural. In Academia, faculty from these institutes conduct workshops for the students on various topics of business and management. During the Industry interface, students get an opportunity to visit the various leading industries of Singapore, where they are able to understand the functioning of the industry and get a chance to interact with the heads of these organizations.

The cultural aspect gives students to enjoy the culture and everyday life of a Singaporean. Singapore is a melting pot of cultures and the students are able to understand how the country has integrated the different cultures to their advantage in order to develop and progress as a nation.

Students who successfully complete all requirements of the academic sessions are awarded a certificate by the respective Institute. Hence, this International Business Program is a blend of academic rigor and self-exploration by the students which gives them a holistic understanding of the nuances required for International Business.
